

Gill

ENGINEERED FOR THE ELEMENTS

2026 BUYERS' GUIDE

PIONEERING TECHNOLOGY

At the heart of Gill's brand proposition – 'Engineered for the Elements' is the promise to provide sailors with wearable technology that they can trust. It's what we've been doing for half a century and exactly what we'll be doing for the next 50 years.

This season we're proud to launch another collection that pushes the boundaries in innovation. From the new OS1 Ocean system, constructed with an upgraded XPLORE+ 3-layer fabric technology, formulated for use in saltwater conditions, to the re-launch of a classic in the form of the new Agile Boot which has been engineered with our own exclusive fit featuring an in-built rake which puts less pressure on the heel and reduces fatigue when hiking or trapezing.

Colour updates within the UV Tec range, including brand new junior styles, and Pilot Jacket that stretch well beyond the water but still encapsulates our marine heritage.

THE ATLANTIC JACKET 1987

THE OS1 - AN ICON YEARS IN THE MAKING

Originally named the Atlantic. The style was launched 38 years ago, in 1987. Worn by many sailors and adventurers over the years in races such as the Vendee Globe, The Ocean Race and Admirals Cup to name just a few, it's been through a relentless program of testing and refining to where we are today, about to launch the 9th edition in the series of what we now know as the OS1 Ocean Jacket.

AN EVOLUTION, NOT REVOLUTION

The OS1 Ocean system sets a new benchmark in offshore sailing gear—designed for those who demand ultimate protection without sacrificing comfort or mobility.

Constructed with an upgraded XPLORE+ 3-layer fabric technology, formulated for use in saltwater conditions, it delivers exceptional waterproof, windproof, and breathable performance.

To further enhance the performance of the OS1 Ocean system we've exclusively partnered with industry leader Nikwax to offer a first for the marine world. Nikwax Direct.Dry is a factory applied Durable Water Repellent (DWR) treatment, free of all intentionally added PFAS.

The Nikwax Direct.Dry DWR adds an eco-conscious layer of water-beading efficiency — keeping the outer fabric drier for longer and improving thermal regulation on extended voyages. The result is a system that actively repels water while maintaining breathability, ensuring you're dry, comfortable, and focused in the harshest conditions.

Direct.Dry achieves 95-100, the highest possible rating on the AATCC 22 Spray Rating Test. With a high wash durability, Direct.Dry's rating stays at 95-100 after five washes, 80 after 20 washes, and will return to 95-100 after being treated with Nikwax technical washes and waterproofer.

IT'S IN THE DETAIL

Maintaining many of the much loved features of the previous generations such as high ocean collar, fully adjustable hood, and a host of safety accents, this suit is packed with features tailored for serious offshore protection and on-deck functionality. Whether you're racing across oceans or enduring heavy weather on the open sea, the OS1 Ocean system is the ultimate line of defence.

See product tech sheets for the full feature callouts on the jacket and trousers.

The latest release of the OS2 surpassed sales forecasts, proving it's just as popular today as it was when it originally launched 25 years ago.

Page 22-23

THE OS2 OFFSHORE JACKET IN GOLDFUSION 2025

Driven by the need for technical and protective dinghy clothing, a young Nick Gill developed the original dinghy smock. We've made continuous improvements over the years and the latest release of the Verso Lite Smock is testament to Gill's relentless and pioneering product development program.

Page 40

THE ORIGINAL DINGHY SMOCK 1975

A large background image showing two hands wearing blue and yellow Gill sailing gloves. The hands are positioned as if about to shake or hold each other, with fingers slightly curled. The background is a solid dark blue. The glove on the left has a white 'Gill' logo on the wristband. The glove on the right has a yellow 'Gill' logo on the wristband.

Trusted by sailors year after year, Gill Gloves have become legendary and the gloves of choice for many sailors. This season we're pleased to launch a Women's version of the much-loved Championship Glove, providing women with a more accurate fit to enhance their time on the water.

Page 80-83

GLOVES

There have been many iterations of sailing boots over the years. Always listening to feedback and carrying out as much on the water testing as possible, we've brought back a much-loved favourite, previously known as The Competition Boot. The new Agile Boot offers a number of significant advantages over neoprene boots with its sturdy waterproof construction, stiff outsole and ability to dry quickly and without unpleasant odours after a day on the water.

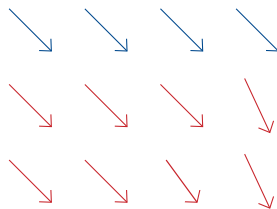

Page 87

FOOTWEAR

FABRIC TECHNOLOGY

UNRIVALLED PERFORMANCE AND COMFORT

Time on the water is about more than just braving the elements – it's about thriving in them, which means sailing kit needs to be reliable and, more importantly, comfortable.

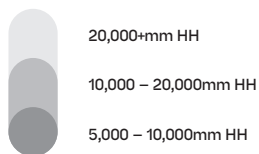

This belief drives us to take a unique approach, creating proprietary fabrics for our waterproof apparel that redefine the industry's standards of excellence.

We subject our waterproof products and proprietary fabrics to extreme testing of their durability and water-repellency, thereby ensuring that when you need to stay protected, you can trust Gill to deliver, because we don't compromise. True comfort is not just about staying dry – it's about feeling secure and confident during every moment on the water.

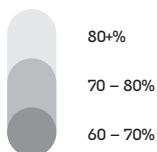

In this guide, each waterproof product is clearly marked with its waterproofness, breathability and durability using the icons below.

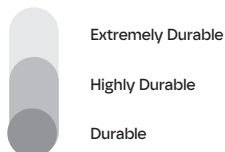

WATERPROOFNESS

BREATHABILITY

DURABILITY

FABRIC DURABILITY

To assess the durability of our fabrics, we employ the internationally recognised Martindale Test, also known as the 'Rub Test'. Our version of this test yields true-to-life results by subjecting the fabric to continuous abrasion, rather than merely rubbing two cloth swatches together. Using a Martindale abrasion machine, a piece of fabric is placed between two discs, with one disc oscillating grit paper across the fabric until signs of distress appear. We hold our waterproof products to a minimum testing standard of 10,000 oscillations, which is three continuous hours of rigorous grit-paper testing.

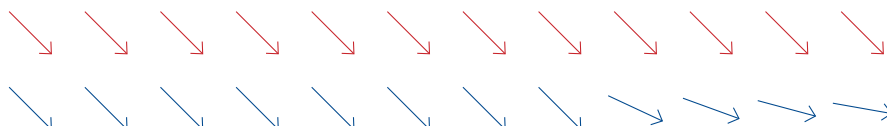

Our OS1 jacket undergoes an extensive 8-hour Martindale Test. Where reinforcement fabrics are used, such as the seat of the jacket or seat and knee area of the salopettes, this is increased to 33 hours of continuous abrasion testing, ensuring unmatched durability for our sailing gear.

BREATHABILITY

Allowing a product to let perspiration escape is just as important as not allowing water in, particularly during active use. Of the three test methods available to show how many grams of water vapour are able to pass through a fabric, we use two, depending on the fabric type. To maximise the performance of your clothing system, we recommend using a base and mid-layer that encourage the process of moisture transportation away from the surface of the skin.

DEFYING WATER PENETRATION

At Gill, we believe in setting the bar higher when it comes to waterproof performance. This commitment to excellence begins with Hydrostatic Head testing – a meticulous examination of how waterproof our fabrics are, giving a measurement expressed in mm (representing how high a column of water would need to be before it penetrates a fabric, causing it to fail). While some international standards permit up to three water droplets to permeate before declaring a fabric non-waterproof, at Gill we take a different approach – we stop at the first droplet. Our minimum testing threshold is 10,000mm, although the majority of our fabrics continue to perform well at more than 20,000mm, with our OS1 Ocean XPLORE+ fabric still waterproof over 30,000mm.

WATERPROOF FABRICS

As a world leader in marine apparel, our ethos has always been to think differently, push the boundaries of innovation, and redefine standards by embracing a unique approach. Rather than settling for conventional, off-the-shelf branded fabrics in our range, we have made it our mission to develop our own fabrics, so we can ensure that they are truly fit for purpose and will withstand the rigours of the ocean. Whether it's enhancing lightness, durability or breathability, we engineer fabrics that surpass expectations. Our commitment to excellence is evident in comparative tests, in which our fabrics consistently outperform other well-known brands.

SHIELD TECHNOLOGY EXCEPTIONAL WATER REPELLENCY

The Gill SHIELD technology found on all of our XPLORE and XPLORE+ fabrics is PFC/PFAS-free C0 technology, supporting our drive to reduce the impact on the environment.

SHIELD technology offers incredible levels of water repellency, giving wearers even greater confidence and comfort when out on the water. Saltwater can easily cause 'wetting out' (where water vapour condenses inside a waterproof layer) – but, thanks to SHIELD, it rolls effortlessly off our waterproof products.

SHIELD does not change the hand feel, comfort or breathability of garments. Each fibre of the outer fabric is coated with SHIELD technology during the manufacturing process, resulting in a durable and long-lasting finish.

XPLORE®
2-Layer Fabric:
Your Gateway
to Unmatched
Protection

XPLORE® boasts a robust 2-layer construction that forms an impenetrable barrier against the elements, keeping you comfortable in the face of the worst conditions. Rigorously tested to a 30,000mm column of water on the Hydrostatic Head, this fabric not only meets but exceeds established waterproofing benchmarks. Its incredible water resilience guarantees that you'll stay dry, defying the challenges posed by unpredictable weather. This fabric has undergone a demanding 4-hour Martindale Test (which involves continuous abrasion with grit paper) to confirm its impressive durability.

XPLORE+®
3-Layer Fabric:
Unyielding
Waterproof
Performance

This highly advanced material ensures a fully waterproof and breathable barrier, keeping you shielded from the harshest elements while allowing your body to breathe. Rigorously tested to a 35,000mm column of water on the Hydrostatic Head, this fabric exceeds waterproofing standards, ensuring that you stay dry and comfortable regardless of the weather conditions you face. XPLORE+® has been subjected to an exhaustive 8-hour Martindale test – a true testament to its robust nature, and a demonstration of its ability to withstand wear and tear that few others can match.

SUN PROTECTION

At Gill we prioritise providing top-tier sun protection in our clothing and accessories. Every fabric in our collection with an Ultraviolet Protection Factor (UPF) rating undergoes rigorous independent testing and certification to ensure it meets stringent standards for UV protection. All of our fabrics with a UPF rating of 50+ are categorised as offering 'Excellent' protection – the highest possible rating.

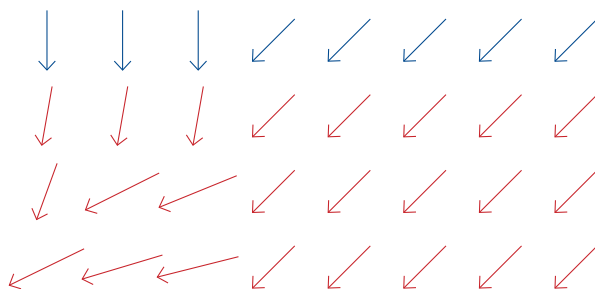

When it comes to shielding yourself from the sun's harmful rays, choosing the right clothing is paramount. This is especially crucial for those who spend extended periods outdoors, particularly on the water, where UV exposure is intensified.

The UPF of our fabrics speaks volumes. With UPF 50+, our fabrics block a staggering 98% of the sun's rays. This translates into a significantly reduced risk of exposure, providing you with peace of mind, as the more coverage you have, the greater the level of protection.

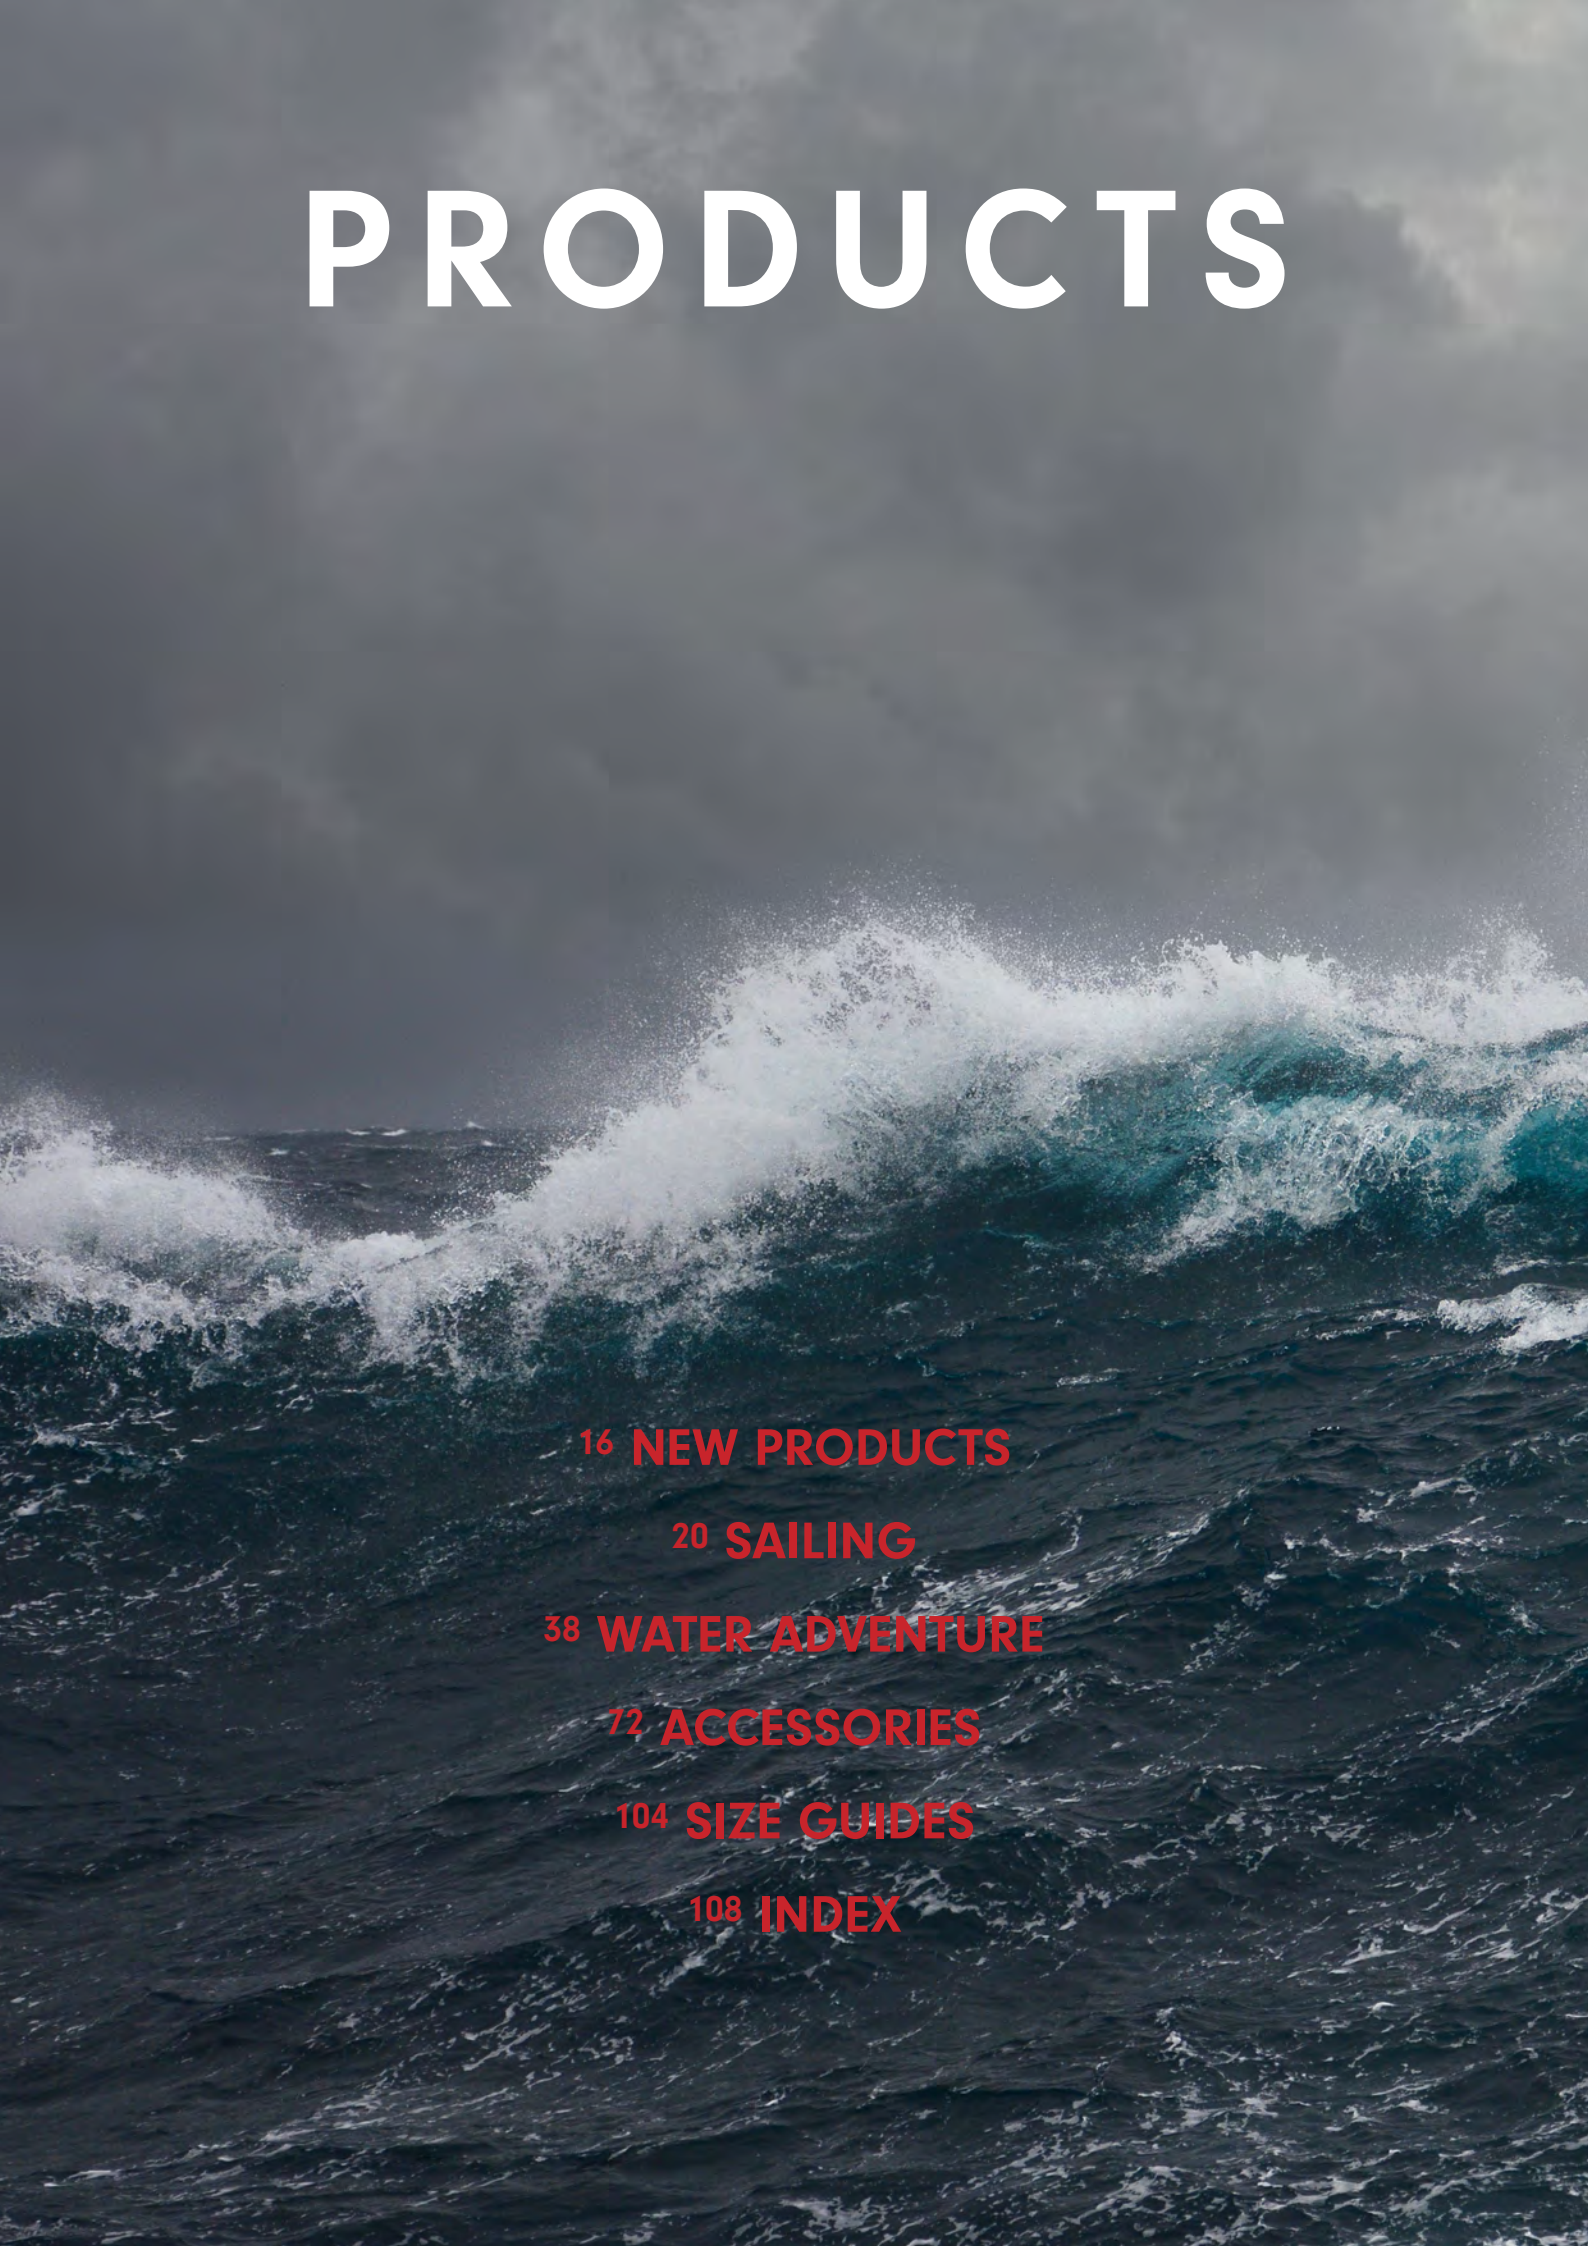

Choosing the right accessories can also enhance your defence against the sun. Our caps offer shade for your scalp and face, while our Wide Brimmed Sun Hat extends protection to your neck and ears. For body coverage, we offer long-sleeved UV Tec Shirts, and all of our sunglasses boast polarized lenses and 100% UV 400 protection.

Prolonged exposure to water, or stretching, can diminish the protective capabilities of Gill garments, so the firm recommends complementing its UPF clothing with regular application of high-factor sunscreen.

Gill's ambition is to allow you to embrace the sun without worry, with the promise of superior sun protection guaranteed.

PRODUCTS

16 NEW PRODUCTS

20 SAILING

38 WATER ADVENTURE

72 ACCESSORIES

104 SIZE GUIDES

108 INDEX

X4 SUPER-STRETCH

With up to 2x the stretch of standard neoprene, these materials provide the ultimate freedom of movement.

4 WAY STRETCH

Materials designed to stretch in all directions, allowing complete freedom of movement.

THERMAL PROTECTION

Materials designed to improve thermal efficiency by trapping body warmth.

GLIDESKIN

Low-friction glideskin neoprene strategically placed for comfort against the skin and protection from chafing.

DI-GUARD

High-tenacity neoprene designed to protect against wear. Strategically placed panels resist abrasion and prolong the life of your garment.

RECYCLED CONTENT

SUN PROTECTION UPF 50+

UPF stands for ultraviolet protection factor and is the sun protective rating measure for fabrics.

UPF 50+ is the maximum sun protective rating achievable for fabrics and means that the fabric blocks at least 95% of UVA and 98% of UVB rays.

Sun exposure causes skin damage

Only covered areas are protected

SAILING

Designed to meet the needs of today's modern sailor this collection of products has been designed with advanced technological details to provide the ultimate protection for any type of sailing activity.

OS1 OCEAN JACKET OS14J

NEW

Technology:

- XPLORE+® 3-layer waterproof and breathable fabric
- Waterproof, breathable and windproof protective outer shell with fully taped seams
- Nikwax® Direct.Dry PFAS free water repellent finish

Features/Benefits:

- Ocean height collar with stowable Face Guard provides protection and comfort
- Thermal brushed mesh inner collar and chin guard
- Packable hi-vis hood with volume adjustment
- Adjustable shockcord hem
- Abrasion resistant panels to protect against wear and tear
- Photoluminescent safety reflectors
- Deep cargo pockets with secure closure with hand warmer pockets behind
- Chest hand warmer pockets
- Security pocket protected by YKK Aquaguard® water resistant zip
- Shackle tool included within cargo pocket
- Internal waist adjustment

Fabric Composition:

- Main: 58% Recycled Nylon / 42% Nylon
- Reinforcement: 60% Polyester / 40% Recycled Polyester
- Brushed Mesh: 100% Polyester

Features/Benefits:

- Flatlocked seams for comfort
- Silicon grip pattern on sole

Fabric Composition:

- 84% Polyester / 16% Elastane

Colour: Black. Sizes: S-XL

EYEWEAR

We've refocused our Eyewear offer by introducing a range of new and updated styles. We've also simplified our messaging and sales proposition so that each new development shares several common features that make them perfect for use on the water and help set our offer apart. All our styles benefit from multilayer polarized lenses with Category 3 tinted protection, UV 400 filters that block almost 100% of the sun's UV rays and they all float in water. An increasing number of styles also feature plant-based frames made using a renewable resource, reducing our reliance on petroleum-based plastics.

Polarized

Polarized lenses eliminate the distracting glare produced by light reflecting off the water or bright deck surface.

Floating

Designed for life on the water, all of our sunglasses float.

Plant-Based Frames

Our bio-based plastic is made using a renewable plant resource, a much cleaner alternative to petroleum-based plastics.

Tinted Protection

Our Category 3 lenses block 82-92% of UV light, making them an excellent choice for protection from bright sunlight.

UV Protection

UV 400 lenses block almost 100% of the sun's UV rays (both UVA and UVB) from damaging your eyes.

Clarity

Optical Class 1 lenses provide distortion free vision and reduce eye fatigue.

Hydrophobic

Hydrophobic outer coating sheds water and reduces salt residue for clear vision.

Oleophobic

Oleophobic technology applied to the inside face repels fingerprints, sun lotion and skin oils.

All of our garments are sized and fitted with end use in mind, we have defined our different types of fit here. Products not labelled as one of our other specific fits will be a regular fit.

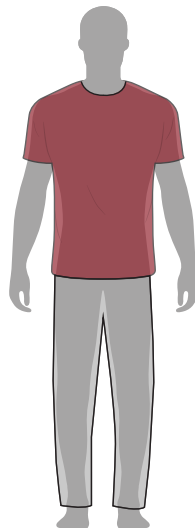

Next to Skin

Follows the contours of the body giving freedom of movement.

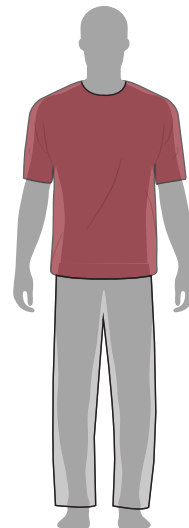

Slim Fit

Closer fit, giving a silhouette that skims over the body.

Regular Fit

Neither close fitting or oversized, designed to be versatile and fit as expected for the products' intended end-use.

Relaxed Fit

Cut looser with more room around the body. Ideal for layering over other pieces.
